

ATP 3500 switch module

The ATP is an exclusive arnotec development and can be customised to suit your application from as little as 100 pieces.

Whether for measuring, test setups or repair:

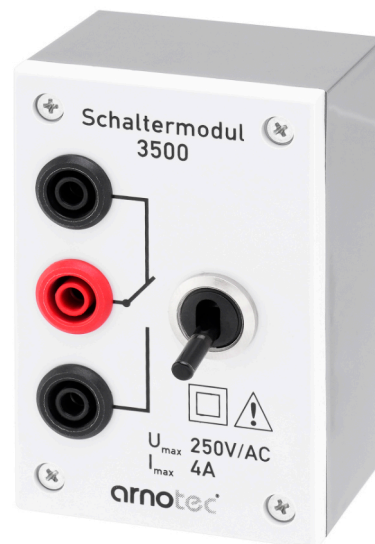

The application possibilities of our ATP switch boxes are almost unlimited and it will quickly become an indispensable helper for daily work in the laboratory.

Advantages:

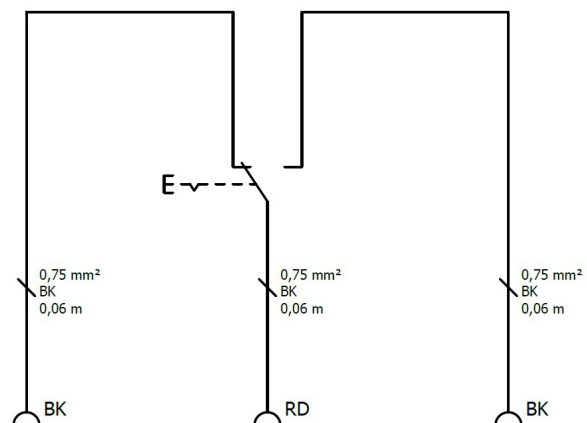

- Immediately ready for use
- To be connected with all laboratory cables 4mm (banana plug) to connect
- Safe from touching dangerous voltage
- The stick switch makes it easy to switch two signals to one output is easy to and with the help of the schematic representation the contact schematic representation, the contact status of the can be recognised immediately.
- In the event of a defect, all components can be easily replaced and require no further explanation

Application:

- Setting up test and simulation circuits
- For test setups and demonstration purposes
- Optimal for training and training use

ATP 3500 switch module

Technical data:

Manufacturer / Model:	ATP 3500
U _{max} :	250 V/AC
I _{max} :	4A
Safety socket:	4 mm
Colours:	2x black, 1x red (middle)
Housing material:	Plastic, ABS
Dimensions:	85 x 56 x 41,4 mm
Colours of housing:	dark grey with light grey lid
Colour of print:	black
Operating and storage temperature:	0° - 50° C
Article or order number:	501443
